

Manufacturing

Client
Procter and Gamble

Location
Beijing, China

Research and Development Center

Key Highlights

- Buildable area of 29,750 square meters
- Includes an 8,270-square-meter Process Research Laboratory
- Fast-track project duration schedule of 18 months

Procter & Gamble (P&G) is one of the global strategic clients of CH2M HILL. Being selected to provide project management services to P&G for their new research and development (R&D) building and process research laboratory (PRL) is a significant win for CH2M HILL to create the new relationship with P&G in China.

The project site is located on the Beijing Tianzhu Airport Industrial Zone (BIAZ) in Beijing. The site has a buildable area of 29,750 square meters, which will house the R&D building and PRL. The Research and Development building will be a four-story structure with 18,634 square meters of above grade gross floor area and 4,898 square meters below grade area. The PRL (Pilot Plant) is an 8,270 square meters single story structure with high bay areas on the process and storage areas.
