

## Our Presence in Ireland

Servier UPA2 Facility, Arklow, Ireland

As a global leader in full-service engineering, project management, consulting, design, construction and operations, CH2M HILL combines international best practices with local expertise to provide solutions that add the most value to your business operations around the globe.

Our Ireland office has been in operation since 1993. It is a permanent, full-service office offering complete design services, contract document preparation, construction management and technical consultancy services, and is our Process Centre of Excellence for Europe.

Our Ireland office is located in Tallaght in Dublin. This office has successfully delivered technology-intensive projects of all sizes, ranging from less than €10,000 in fees to design/build projects exceeding €300 million.

DAA Reservoir, Dublin, Ireland

Dublin office has strong capability in M&E design and C/S/A design and uses the most advanced design tools including full 3D.

Our office in Dublin, like all of our international offices, is electronically connected to the remainder of the CH2M HILL organisation on our own internal private intranet. This enables the Dublin office to share work with the other offices in the CH2M HILL family of companies.

IDA, Ireland

### Recent References

**Servier (Ireland) Industries Ltd**—CH2M HILL delivered full EPCMV professional services for Servier's two-storey, 6,285 square metre, €47 million pharmaceutical plant in Arklow on the east coast of Ireland. The new plant will produce 50 to 70 million boxes of tablets; annually doubling the existing site's manufacturing output.

**Dublin Airport Authority**—CH2M HILL provided engineering, design, and construction management for the new reservoir, which can hold 14.5 million litres of water at Dublin Airport, as part of the utilities programme within the €2 billion transforming Dublin Airport programme.

**Confidential Client**—CH2M HILL has designed over 15,000 square metres of clean room space and associated utilities since 1991, and is continuing to provide services for this large capital programme.

From site selection, master planning, and feasibility studies through design, permitting and construction to start up, commissioning and operations—we are your single point of contact and responsibility.
